PROFILE SUMMARY:

AWS Cloud & DevOps Engineer with hands-on experience automating infrastructure, building CI/CD pipelines, and improving reliability across distributed systems. Strong in Python/Boto3, Terraform, CloudFormation, and AWS networking. Passionate about reducing operational toil, increasing deployment speed, and improving cloud observability.

TECHNICAL SKILLS:

- **CLOUD:** AWS (EC2, VPC, IAM, Lambda, S3, DynamoDB, ALB/NLB, CloudFormation)
- **INFRA-AS-CODE:** Terraform, CloudFormation
- **CI/CD:** Jenkins, GitHub Actions, AWS CodePipeline
- **CONTAINERS:** Docker, ECS
- **MONITORING:** CloudWatch, Grafana, Prometheus
- **PROGRAMMING:** Python (Boto3), Bash
- **DEVOPS:** Networking (DNS, Load Balancing, VPC design), IAM, SSL/TLS, Logging
- **TOOLS:** Git, GitHub, Linux

EDUCATION:

Saint Cloud State University Saint Cloud, MN

Aug. 2022 – May. 2024

Master of Science in Computer Science - 3.79/4

Prasad V Potluri Siddhartha Institute of Technology, India

Sept. 2013 – April. 2017

Bachelor of Engineering in Information Technology - 8.9/10

PROFESSIONAL EXPERIENCE

System Development Engineer Amazon | Sunnyvale, CA

Aug. 2024 – Current

- Automated CloudWatch alarms, IAM operations, and DynamoDB → S3 pipelines using Python/Boto3, reducing manual operational tasks by 60% and increasing monitoring accuracy by 80%.
- Built Infrastructure-as-Code using Terraform and CloudFormation, standardizing multi-region provisioning and reducing environment setup time by 90%.
- Designed and maintained AWS services (EC2, VPC, ALB/NLB, Lambda, S3, Route53), improving application reliability by 35% and cutting configuration drift by 70%.

- Improved CI/CD workflows using Jenkins and GitHub Actions, reducing deployment time by 40% and eliminating 95% of manual promotion steps.
- Developed reusable IAM permission automation templates for multi-tenant AWS accounts, reducing onboarding time by 70% and lowering access-related tickets by 50%.
- Troubleshoot provisioning issues (IAM, subnet routing, tagging gaps), reducing environment inconsistencies by 55% and improving deployment success rates by 30%.
- Implemented automated DynamoDB → S3 ETL processes via EventBridge and Lambda, reducing data-aggregation time by 100% and improving reporting freshness by 3×.
- Supported production incidents by analyzing CloudWatch metrics and logs, improving MTTR by 45% and ensuring service restoration within strict SLAs.

Software Developer Intern - Advanced Interconnect Technologies | St. Cloud, MN

Jan. 2023 - April. 2023

- Built a Node.js + React.js interface for multi-department order tracking, optimizing workflows.
- Enhanced system responsiveness through dynamic data retrieval and frontend optimizations.

Consultant - Deloitte | Hyderabad, India

Oct. 2019 - May. 2022

- Managed Jenkins CI/CD pipelines for multiple applications, improving build reliability and deployment speed.
- Automated backend tasks using SQL and scripting, reducing manual operations and support overhead.
- Collaborated with DevOps teams to enhance build and release workflows.
- Improved release quality through automated testing and deployment validation.

Senior Software Engineer - Capgemini | Chennai, India

May 2017 - Sept 2019

- Automated testing workflows using Jenkins and Selenium, reducing manual QA effort.
- Built scripts for backend automation, improving data validation and system reliability.
- Supported build and release processes by integrating CI/CD best practices.

CERTIFICATIONS:

- AWS Certified Cloud Practitioner (CLF-C02)
- Oracle Certified Associate, Java SE 7 Programmer
